

Model CBT

Creep Burst Tester

Complies with ASTM test methods F1140 and F2054

Specifications:

- Burst testing provides quick and accurate determination of package integrity.
- Testing controlled and monitored by included PC, equipped with data collection system Perspico CB
- Multiple test configurations: Burst, Creep, Creep to Failure and Creep to Burst.
- Configurable pressurization rate, creep duration and pressure sensitivity.
- Digital Data output, support for save and load projects, print reports
- Dimensions: 12"L x 14.5"W x 16"H (300mm x 370mm x 400mm)
- Instrument weight: 27 pounds (12 kilograms)
- Required utilities are 120-220 VAC and 80 PSI compressed air.

Applications:

- Rigid thermoformed cups
- Rigid thermoformed trays
- Injection-molded cups
- Other containers

Standard Features

- Perspico CB 2.0 control and monitoring software
